-  5000mAh Large Capacity
-  90min Long Battery Life
-  Lightweight and Portable
-  5-fold Protection

Power source out of reach

Insufficient sockets

No power outdoors

Unsafe extension cords

Don't let the distance from the socket limit your pursuit of cleanliness.

HUTT E+ Portable Mobile Power Bank

Freely Clean without the Need for Cords

We've innovatively developed an exclusive external portable power bank for window cleaning robots. It solves common problems such as scarce home power outlets and lack of power near windows. Enter a new era of unrestricted window cleaning.

Clean Large or Small Windows Freely

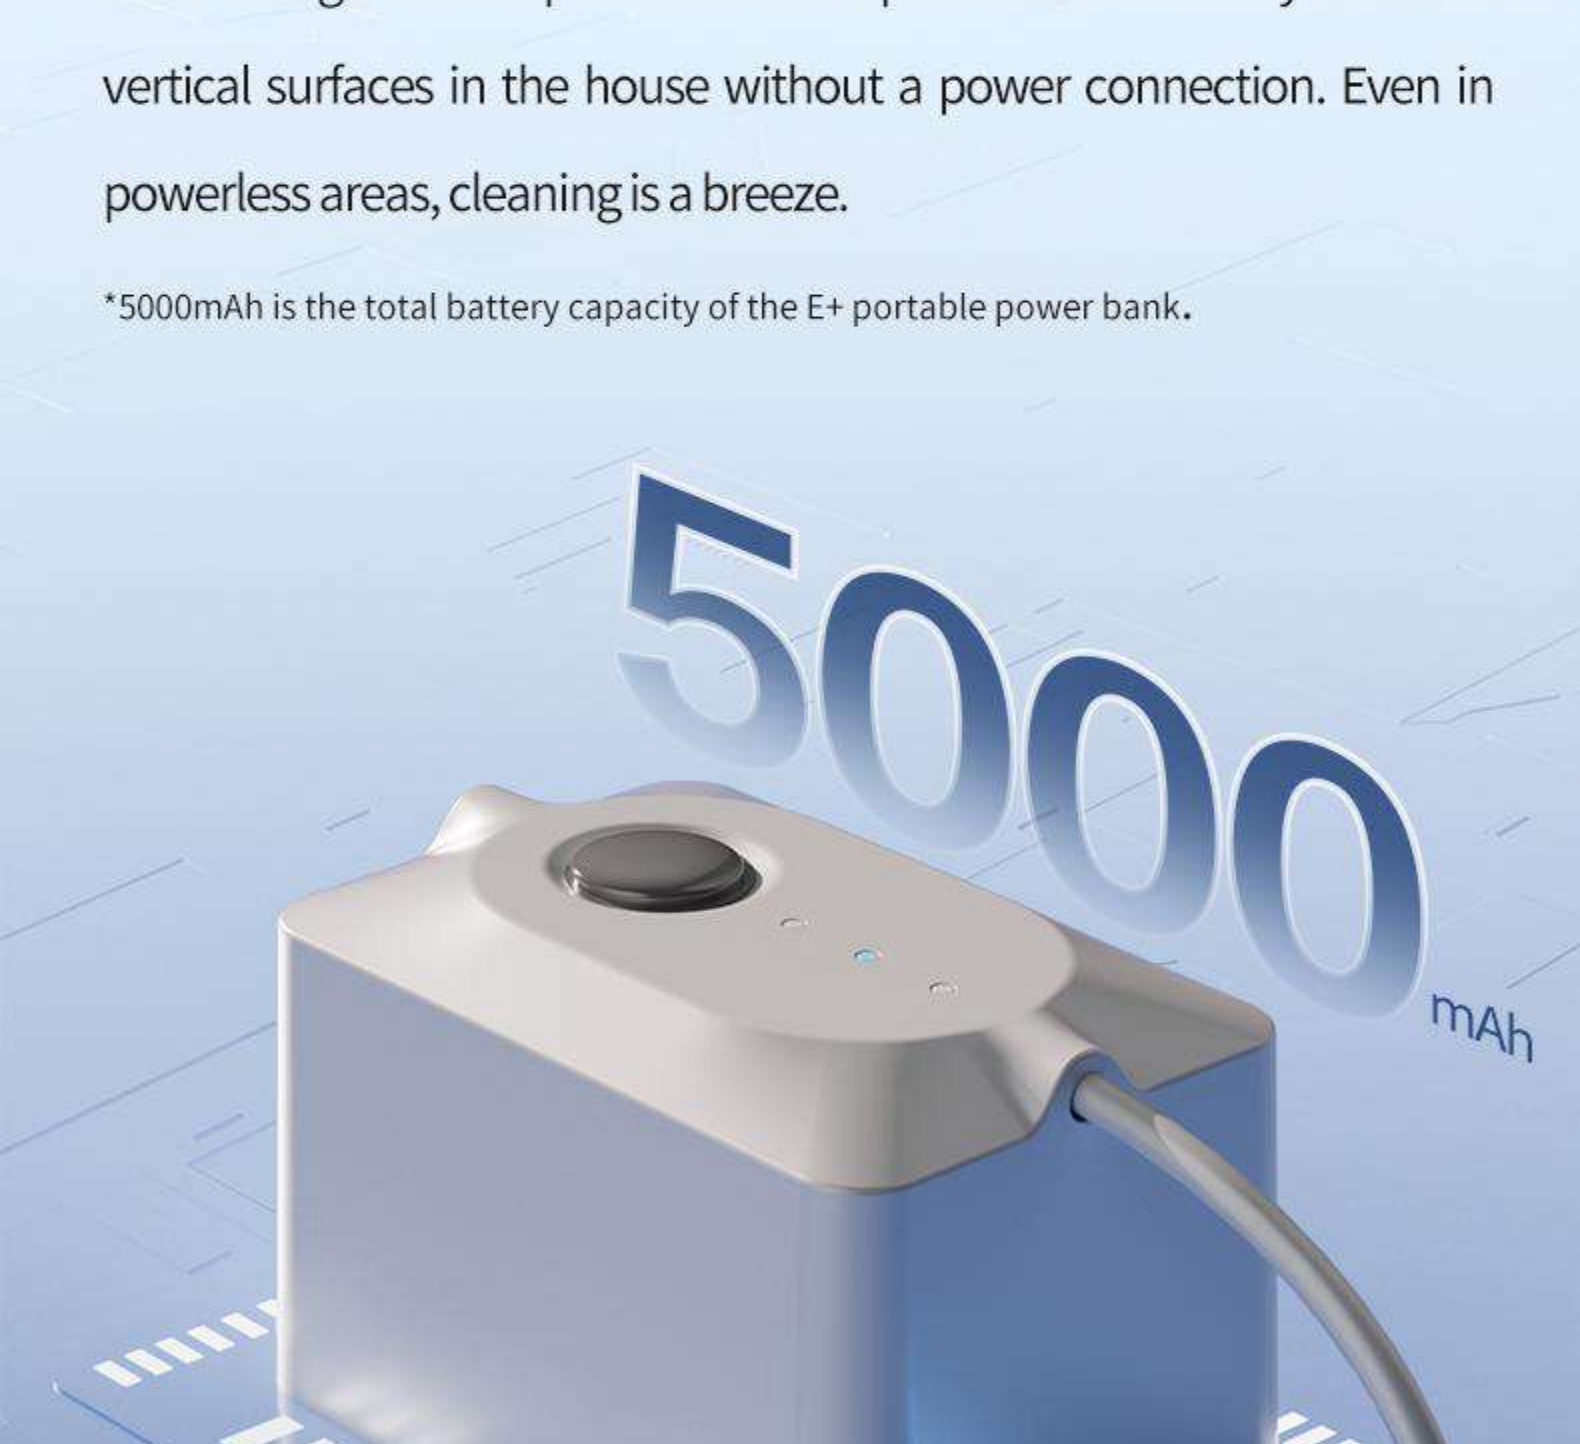

Effortless Cleaning, Maximum Efficiency

For large windows, the portable power bank overcomes cord length limits, ensuring stable power for efficient window cleaning. For small ones, it moves flexibly with the cleaner, preventing cord tangles.

floor-to-ceiling window glass

Small Size, Big Power

Ultra-portable, Take It Anywhere

It's compact and easy to store. Weighing just 990g, it can be easily picked up with one hand, allowing you to clean wherever you go.

Portable Power Bank

Charging Base Station

Weighing just 990g: Ultra-light and Easy to Carry

Just 13cm Wide: Effortless Placement Anywhere

Multi - device Compatibility (W9, A1, C7)

Seamless Wired/Wireless Switch

High Cost - effectiveness: Affordable Pricing

Available for Single Purchase: Enhanced Flexibility

Independent Charging: Flexible & Convenient

Weight > 5kg: Cumbersome to Carry

Dimensions (L&W)>30cm: Limited Placement Options

Device - specific Compatibility Only

No Ext. Power, Recharge When Drained

Low Cost - effectiveness: Doubled Price

Integrated Unit: High Renewal Costs

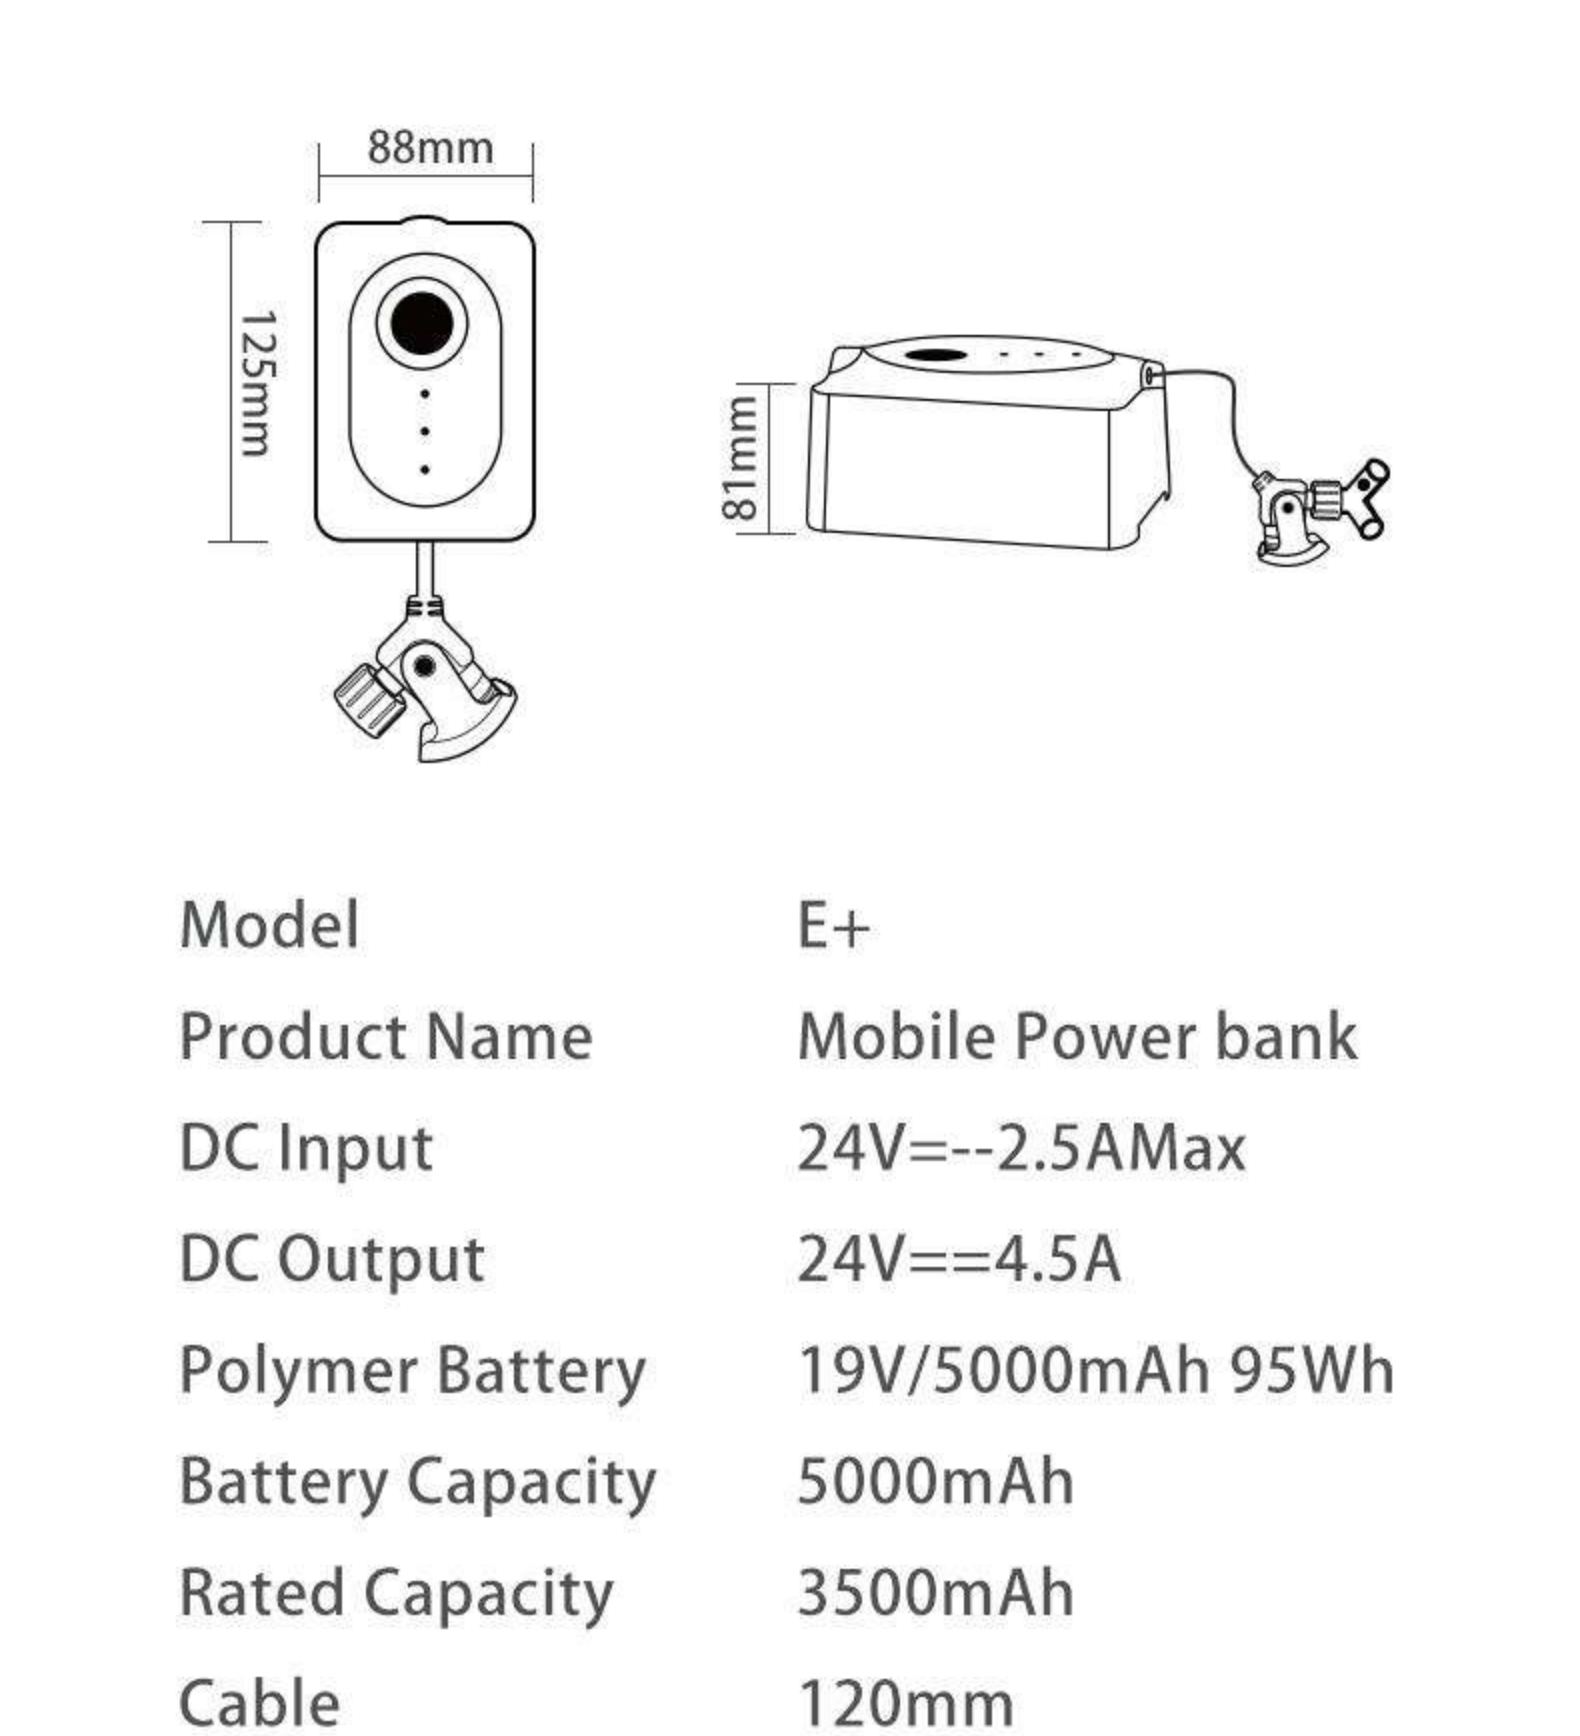

Charging with Device: Clumsy & Restrictive

5000mAh High Capacity Battery*

Powers a Whole-house Clean

A full charge offers up to 90min of operation. Effortlessly clean all vertical surfaces in the house without a power connection. Even in powerless areas, cleaning is a breeze.

*5000mAh is the total battery capacity of the E+ portable power bank.

Automotive-grade Battery Cells

Longer Life, Greater Durability

We adopt the same high-quality industrial-grade battery cells used in digital devices and new energy vehicles. These cells offer a longer lifespan, robust power endurance, and outstanding durability.

HUTT Battery Cells

Ordinary Battery Cells

25W Flash Charging twice the Lifespan of Ordinary Cells

Power < 15W Slow Charging Short Service Life

Multiple Protections for Worry-free Safety

- Overcharge Protection
- Overcurrent Protection
- Temperature Protection
- Over-discharge Protection
- Overvoltage Protection

Effortless Wired/Wireless Switch

Meets Diverse Needs

Wired Operation: The machine can be used by direct plug-in, with no need to worry about battery.

Wireless Operation: The machine can also work with a power bank for wireless, more flexible operation.

Product parameters

Model	E+
Product Name	Mobile Power bank
DC Input	24V==2.5AMax
DC Output	24V==4.5A
Polymer Battery	19V/5000mAh 95Wh
Battery Capacity	5000mAh
Rated Capacity	3500mAh
Cable	120mm
Weight	990g
Dimensions	125*88*81mm
